PROJECTS

Tic-Tac-Toe Royale

11/2021 - Present

- Created a full-stack online web game.
- Players are able to set board size, board color, "win by" condition (amount of pieces in a row required to win) and pieces (upload custom piece capability included).
- Capable of having up to 100 players per board.
- Bots, lobby browser capability and many more features are coming soon.
- Client was created with TypeScript React.js, the REST API with Python (Django), and real-time client updates are handled with Socket.IO.
- Try it here: [Tic-Tac-Toe Royale](#).

Analyze This

10/2021 - 11/2021

- Created a full-stack web application that parses strings for signs of mental illness. Results help provide support to the user.
- At the moment, it detects signs of suicide, anger, and addiction.
- To analyze strings, I developed an algorithm that works with a large pool of words to find determinants of mental illness.
- Determinant words must be in a certain order to be flagged.
- Analysis results and Google Maps/Places API are used to find the nearest support facilities (rehab, support groups, etc.) and resources.
- Client was created with TypeScript React.js, the REST API with Python (Django), and data is stored and queried from Firestore (NoSQL).
- Try it here: [Analyze This](#)

Do or Do Not

08/2021 - 09/2021

- Created a social task-managing full-stack web application.
- Allows you to create, share, edit (drawing and image importing features included), and complete tasks with users on your friends list.
- Includes user authentication, a friends list (received and sent friend requests) and friend alerts (ex. notifying a user when a friend has completed a shared task).
- Client was created with React.js, the REST API with Python (Django), and data is stored and queried from PostgreSQL (NoSQL).
- Try it here: [Do or Do Not](#).

TECHNICAL SKILLS

- > Python, Django, Flask, SQLAlchemy.
- > JavaScript, TypeScript, React, Redux.
- > Socket.IO
- > Bootstrap, Material-UI, CSS, HTML.
- > SQL, PostgreSQL, MySQL.
- > NoSQL, Firestore.
- > Git, GitHub.
- > Firebase, Heroku.

CERTIFICATIONS

Data Structures

UC San Diego (Coursera)
06/2021 - 08/2021

Algorithmic Toolbox

UC San Diego (Coursera)
05/2020 - 07/2020

EDUCATION

State University of New York at Old Westbury

Old Westbury, NY
01/2011 - 05/2014
B.A. in Psychology

Crane School of Music

01/2010 - 03/2010

EMPLOYMENT

Store Manager, LGX

Garden City, NY
01/2018 - 08/2021
